

Appendix I: Breeding of Animals

IACUC Protocol # _____

Please provide a justification for the need for breeding (e.g. animals are not commercially available, in utero studies, reproduction studies etc.)

List the species and strain/stocks of animals to be produced in your breeding program:

Anticipated total number of offspring for each species that will be produced (per year): _____

Anticipated number of offspring that will be used for experiments: _____
(*Suggestion: Be sure this number matches the number on page 1*)

What will be done with the surplus?

Transgenic/Knockout Breeding Programs

DNA/transgene or gene to be disrupted:

Anticipated consequences of the animal genetic manipulation:

Method of monitoring presence of transgene in the animals.

Describe any special care or monitoring that may be required:

Who will perform this monitoring and care?

What is the disposition of the founders and how long will they be maintained?
