Appendix J: BIOMEDICAL PROCEDURES

If the proposed research involves biomedical procedures (e.g., the taking or withholding of medication, ingestion of any food or other substances, injections, blood drawing, or any other procedure which would normally be done under medical supervision) please provide the following information

1) Describe, in detail, the biomedical **procedures** involved in this project

2) Identify anticipated and possible physiological **consequences** of this procedure for the subject(s) and steps to be taken to screen out subjects who may be at exceptional risk

3) Identify the **site** where the procedure will occur

4) Indicate the investigator's competence and identify his/her **qualification**, by training and experience, to conduct this procedure.
